

WILLBRANDT Rubber Expansion Joint Type 49

DN 32 - DN 500

Type 49 is a high-corrugated, highly elastic rubber expansion joint. Its high corrugation means that it has very low inherent resistance. It reduces up to 98 % of structure-borne noise. It is also characterised by very high movement absorption for a short installation length and variety of rubber qualities, which means that a suitable rubber compound is available for every application (see material descriptions).

Type 49 is primarily used in building technology, where it is used to absorb expansion, vibration and to insulate sound. It is also used in industrial applications, particularly in the field of weighing technology. Its very low inherent resistance makes it very suitable for decoupling scales / load cells.

| | | | |
|--------------------------|---|-----------------------------|--|
| Bellow design | High-corrugated rubber bellow with reinforcement and shaped sealing bead with core ring, self-sealing (no additional seals required). Suitable for swiveling flanges. | Flange version | Both sides with swiveling flange made of galvanized steel with threaded holes, drilled according to DIN PN 10 (standard). Other materials and dimensions are possible. |
| Vacuum resistance | Can be used up to -200 mbar without additional accessories, full vacuum possible with vacuum supporting spiral/ring. | Approvals/Conformity | Similar to DIN 4809 / TÜV approved, drinking water and shipbuilding approval, FDA and EG 1935/2004 conform |

*black EPDM max. DN 200

Bursting pressure: 75 bar
black EPDM 30 bar

Important information

**For aggressive media, please see the resistance table (can be requested separately).
The bellows should not be painted or insulated. Please refer to the installation instructions.
++++ We will be happy to send you further information on the individual types and designs. +++++**

WILLBRANDT Rubber Expansion Joint Type 49

Application

Type 49 A-red

For heating installations according to DIN 4809. For many years of operation under constant loading with hot water and heating water at 100 °C/110 °C at 10 bar/6 bar operating pressure. Electrically conductive surface. Not suitable for media with additives containing oil.

Type 49 blue

For drinking water, hot water, sea water, cooling water with chemical additives for treating water, saline solutions, weak acids and weak alkaline solutions. Not suitable for oil products or cooling water with additives containing oil. Electrically dissipative inner surface and electrically conductive outer surface.

Type 49 yellow

For oils, lubricants, fuels, gases, city and natural gas (not liquefied). Electrically conductive surface.

Type 49 white

For foodstuffs containing oil and fat (rubber in food-grade). Electrically insulating inner surface, electrically conductive outer surface. Not suitable for drinking water.

Type 49 green

For chemicals, aggressive chemical wastewater and compressor air containing oil. Electrically insulating surface.

Type 49 black EPDM

For hot and cold water, sea water, cooling water, weak acids and alkali solutions, technical alcohols, esters and ketones. Electrically dissipative inner surface, conductive outer surface. Max. pressure 10 bar.

Note!

Detailed material descriptions on pages 5 - 7.

Design A - without tie rods

Can be used for movement absorption in any direction (for combined movements, see the movement diagram in the technical appendix), noise and vibration insulation.

The expansion joint's reaction force must be absorbed via suitable piping.

Dimensions for Design A

*1 WF = effective area

*2 Other standards/dimensions possible.

Permissible degree of utilisation for movement areas:

- up to 50 °C: Utilisation ~ 100 %

- up to 70 °C: Utilisation ~ 75 %

- up to 90 °C: Utilisation ~ 60 %

WILLBRANDT Rubber Expansion Joint Type 49

Length limiters

There is a selection of various length limiters / tie rods to absorb the reaction force and to protect the bellow from overstretching or collapsing:

Design B*
with tie rods

Design C*
with tie rods/thrust limiters

Design E
with tie rods and spherical washers/conical sockets

Design S
with tie rods/thrust limiters and spherical washers/conical sockets

*Note: In Designs B and C the lateral movement absorption is reduced by around 50 %.

Accessories

- Vacuum supporting spirals / rings
- Guide sleeves
- Potential equalisation
- Flame-resistant protective covers
- Dust and splash protection covers
- Earth cover hoods

Flange dimensions for designs with tie rods

| DN | Length BL | Flange PN 10 (example dimensions) | | | | | | | ØC |

DN 32 - 200

DN 250 - 500

Important information

Various bolt packs (SU) are available for the standard design.
 Please note the appropriate fixed point constructions and plain bearings in your piping system! For more information please refer to our installation instructions.
 For information on the tie rods, please see the technical appendix (p. 89 - 92)!
 ++++ We will be happy to send you further information on the individual types and designs. ++++

WILLBRANDT Rubber Expansion Joint Type 49

Axial stiffness rates

| DN | Length BL mm | Stiffness rates (average value form full way) | | | | | | | | |
